Please summarize what occurred.

I have been being tortured continuously for the past 4 or 5 months. However, the way the perpetrator is doing it is external and not widely known.

They do make use of the Frey effect to induce audio, and I believe make use of electricity somehow similar to this article:

<https://pmc.ncbi.nlm.nih.gov/articles/PMC5066827/>

To 'hear' for lack of a better term the subject's internal monologue speech.

I believe this woman is also a victim to the same torture that I am currently enduring.

They do this 24/7, without giving the subjects any break while claiming to be the police.

I've tried to reach out to police at the local, county, state and federal levels and have been denied any recognition of any of my concerns.

I also attempted to reach out to local media stations in Ohio, and did not receive any response from any of them.

Just some examples of the methods used to torture victims on the ground:

- Simulating chest pain and arm tingling from a heart attack
- Simulating opiate withdrawal symptoms, specifically hot flashes and body load
- Simulating exaggerated illness based off a preexisting minor illness
- Pain in testicle, alternating left and right at the operator's pleasure
- Pressure in the ear as if dunked underwater
- Sinus pain

This list is nowhere near exhaustive.

The perpetrators seemed to have an effect on people close to me as I go through everyday life. They are able to get into my online accounts by knowing my password as I type it. I have had to switch to KeePass and a specific workflow to keep the people doing this out of my account.
